## **ForgetNot! License Key**

What is it? ForgetNot! Crack Keygen is a lightweight software application whose sole purpose is to help you remember important events, such as birthdays or anniversaries. The tool is able to show popup notifications for all configured reminders. It can be deployed on all Windows versions out there, provided that you have the Java working platform installed on the target computer. Clean looks The program sports a simple design that allows you tweak the dedicated parameters in a short amount of time. You cannot appeal to a help manual to read more about the configuration process, but you can manage to configure events on your own. Set up reminders ForgetNot! Cracked Version offers you the possibility to store a new event by providing information about the day, month, and year. In addition, you may assign an icon to each reminder so you can quickly differentiate them, set up recurrence parameters (weekly, monthly, or yearly), enter a custom text message, as well as make the utility show reminders. What's more, you can check out all configured events listed in the main window, click on a particular event in order to view extra details about it, and delete, duplicate, or modify entries with a few clicks. If you hover the mouse cursor over the utility's icon in the system tray, you can check out the number of days until the next event. Plus, you can store the information to a database file on your PC. Tests have pointed out that ForgetNot! Crack Mac carries out a task quickly and without errors. It remains light on system resources so the overall performance of the computer is not affected. You may keep it running in the background. Final words To sum things up, ForgetNot! Product Key comes bundled with several handy and simple features for helping you get notifications before a certain event occurs. It can be tweaked by less experienced users and professionals alike.
